Local Landmarks

1. Walworth Road - High Street Retail
2. East Street Market
3. St Peters Church
4. Monkey Park
5. Faraday Gardens
6. Sutherland Square
7. Pasley Park
8. Walworth Farm
9. Nursery Row
10. Burgess Park
11. Green Link as set out in E&C Supplementary Planning Document

Context Summary

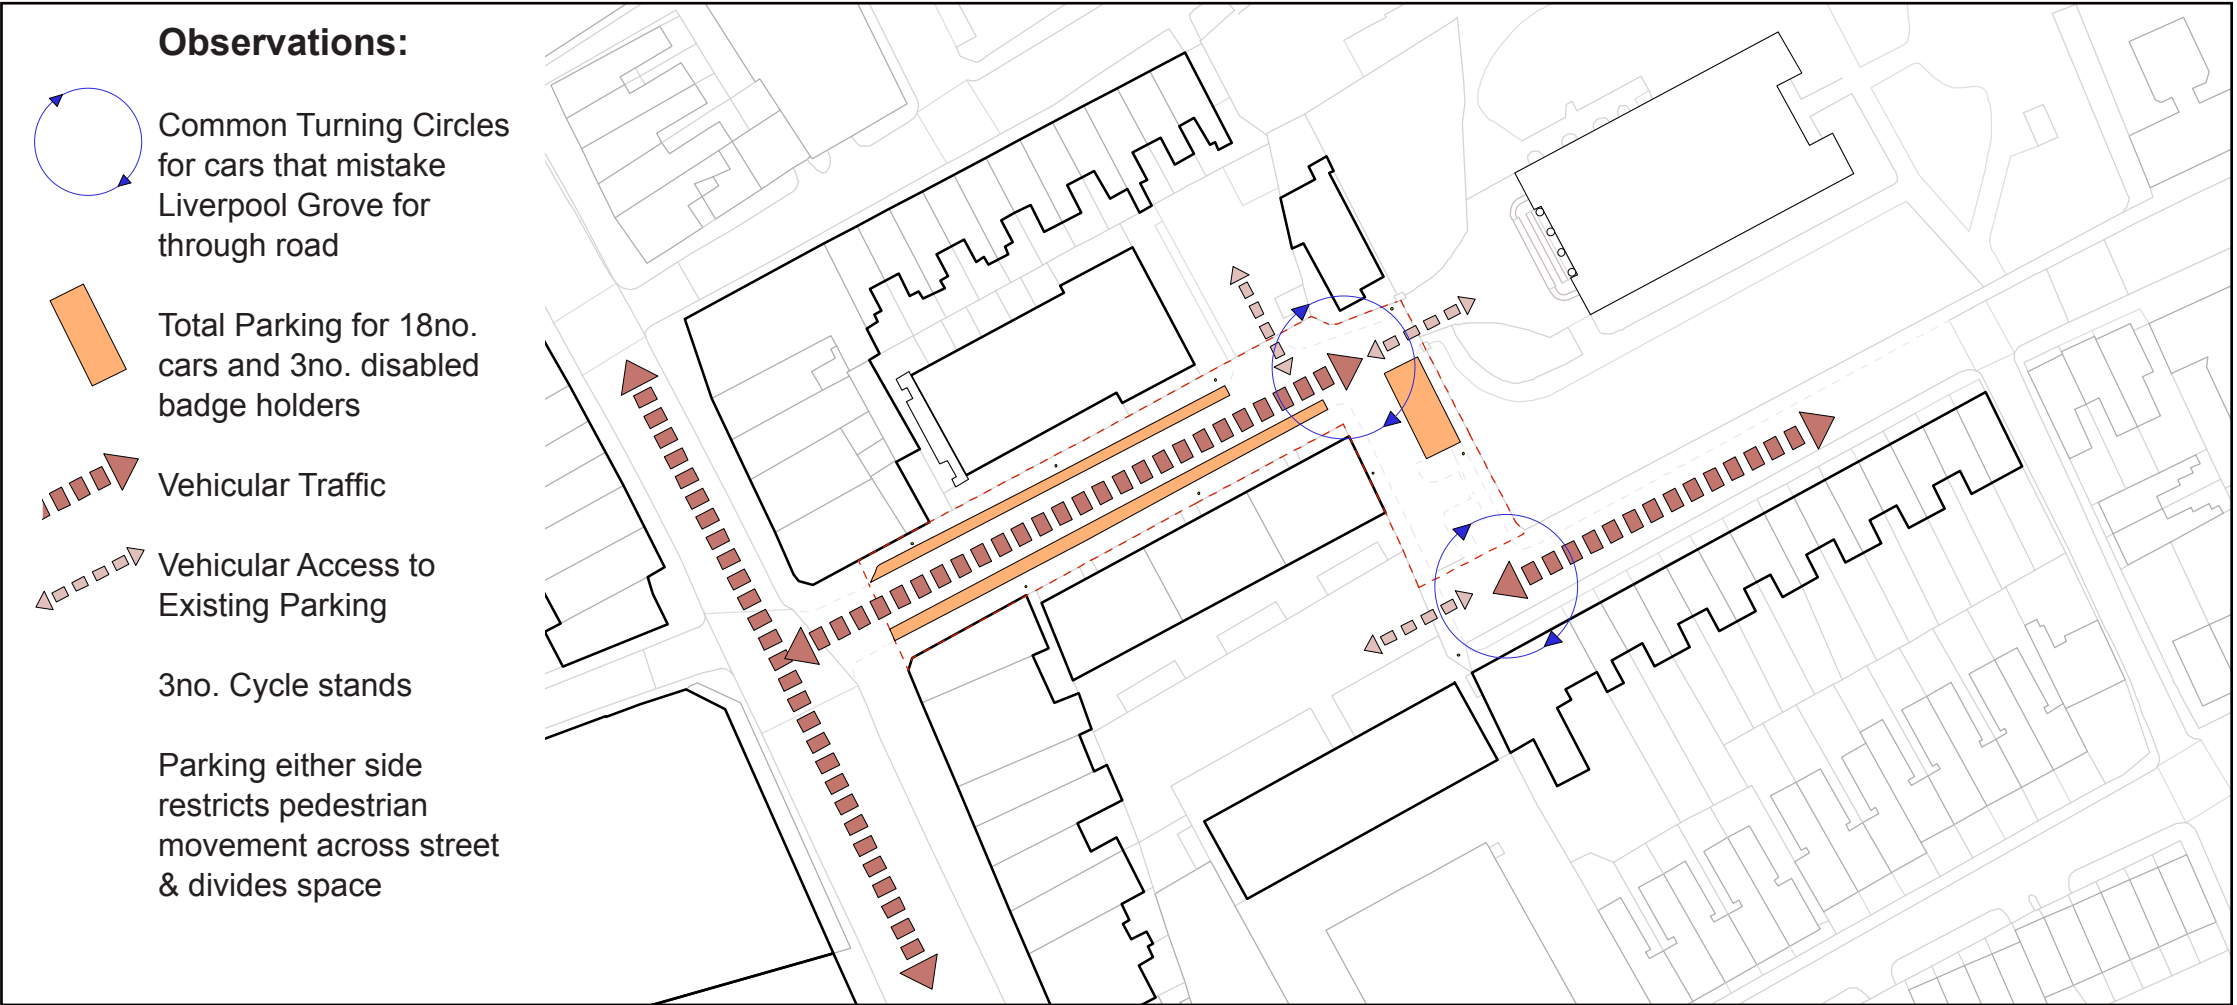

The site of Liverpool Grove is at the heart of Walworth and is located within Liverpool Grove Conservation Area.

At present it provides a hidden throughway for the local community as they travel from to and from the High street & market.

The beautiful St Peters church should have a more appropriate setting when viewed from the Walworth Road.

St Peters Church is more than just a Grade I listed building, it gives a base to the great community work being done by InSpire. The Parish Church of St Peter, is also home to a vibrant Anglican Christian community of faith which engages in significant community engagement.

Liverpool Grove is the ideal opportunity for a new public realm scheme to better link St Peters with the High Street and to improve green infrastructure connections.

Precedent:
Exhibition Road - Knightsbridge

Shared Space Approach including level surfaces, continuous materials encouraging slower vehicle speeds & increased pedestrianisation.

Vehicle uses bottom of Liverpool Grove to turn around in

Vehicle looking for a convenient free stop off the Walworth Road

Existing typical street arrangement; pavement, parking & carriageway

Precedent:
Brighton New Road - Brighton

The Brighton New Road is a shared space scheme. The emphasis of the scheme is weighted towards the pedestrian experience whilst allowing vehicular access. The scheme provides many seating opportunities along its length and makes a strong connection with the existing adjacent park and the High Street.

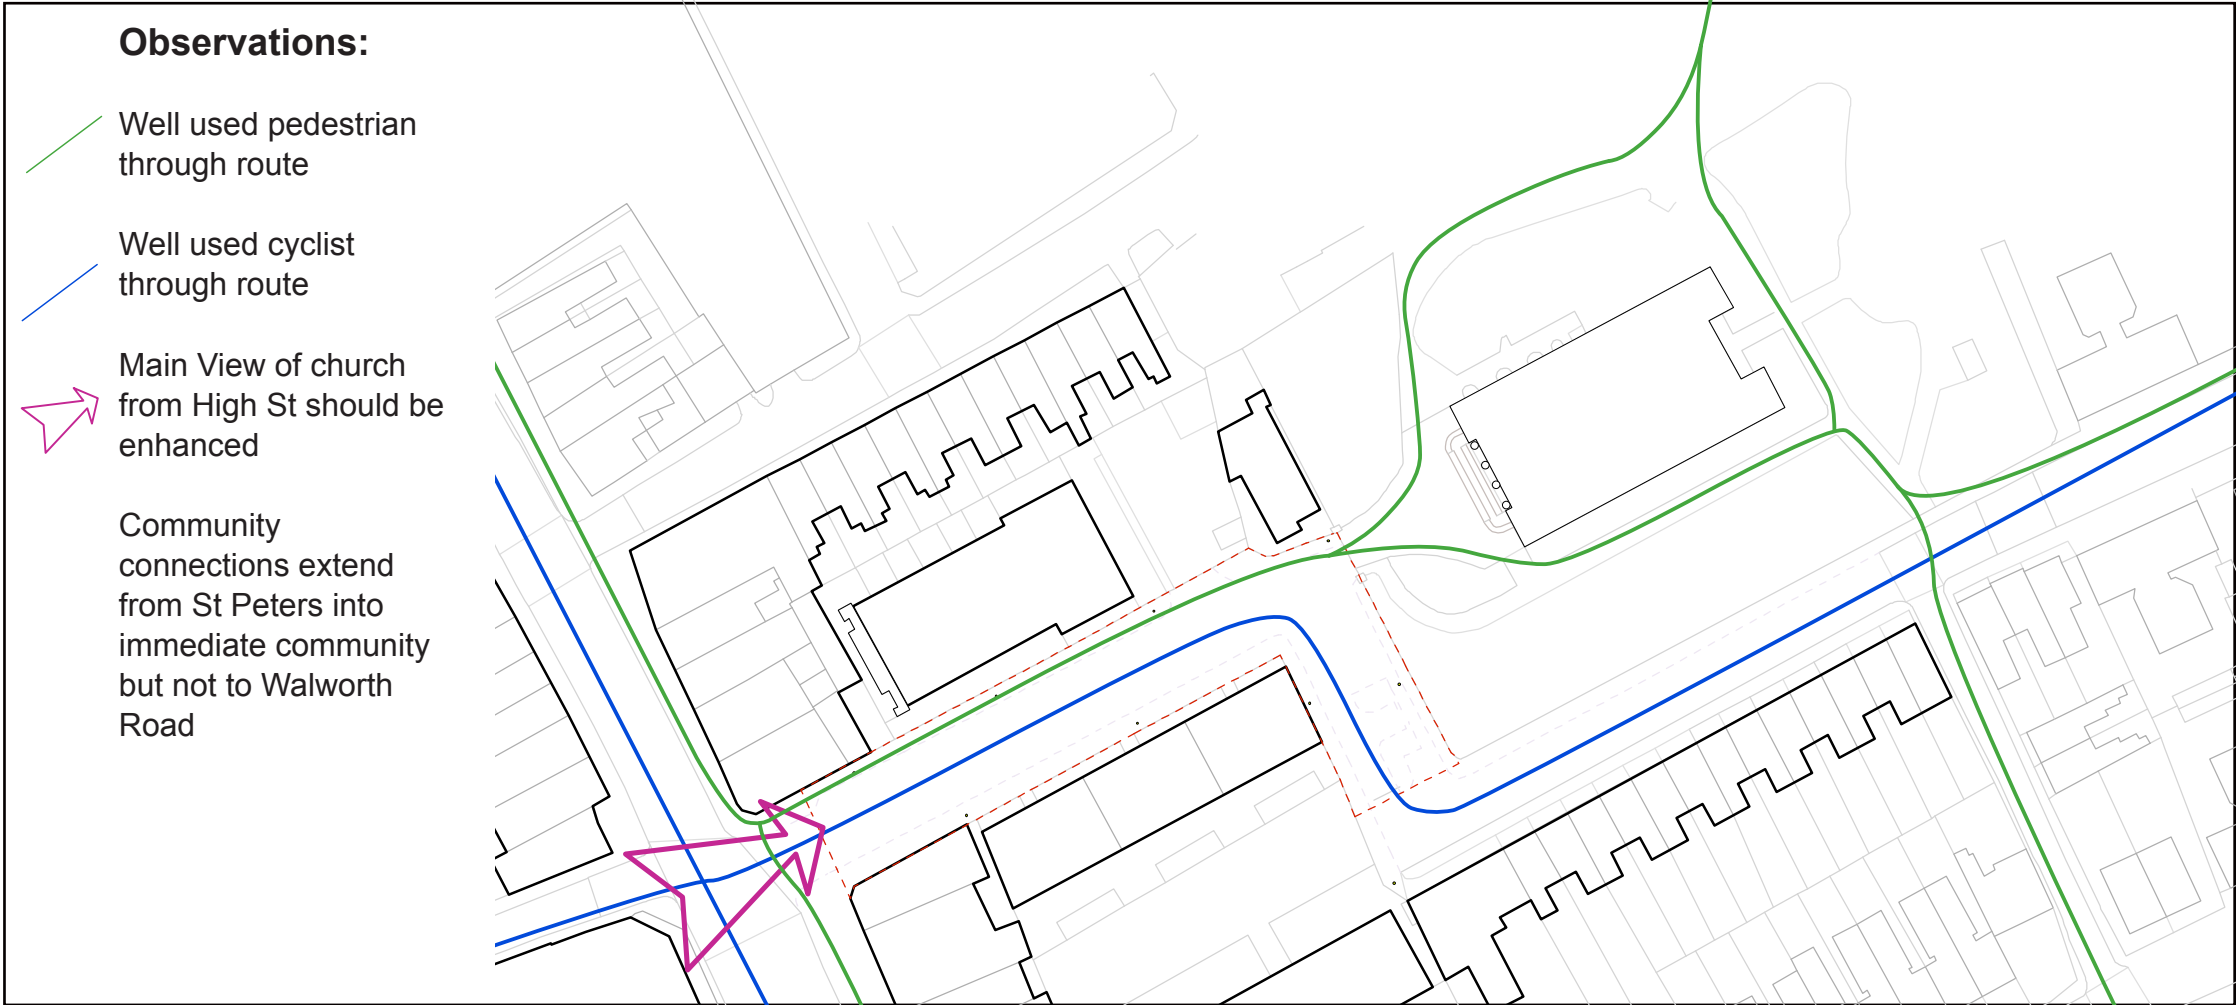

The only visual greenery is within St Peters grounds

Quiet Area where Liverpool Grove returns. This space has potential and is currently underused.

Lack of trees / planting within space results in desolate canyon effect between the adjacent buildings

Precedent:
Minehead - Street Dance Performance

Pedestrianised Space gives way to impromptu & organised public performances / events / vendors / art etc.

Quiet Area (P4) could provide opportunities for the local community or InSpire to host programmed events.

Monkey Park adjacent to St. Peter's church is supported by the church and volunteers

Cyclists & pedestrians use throughway despite awkward barrier design

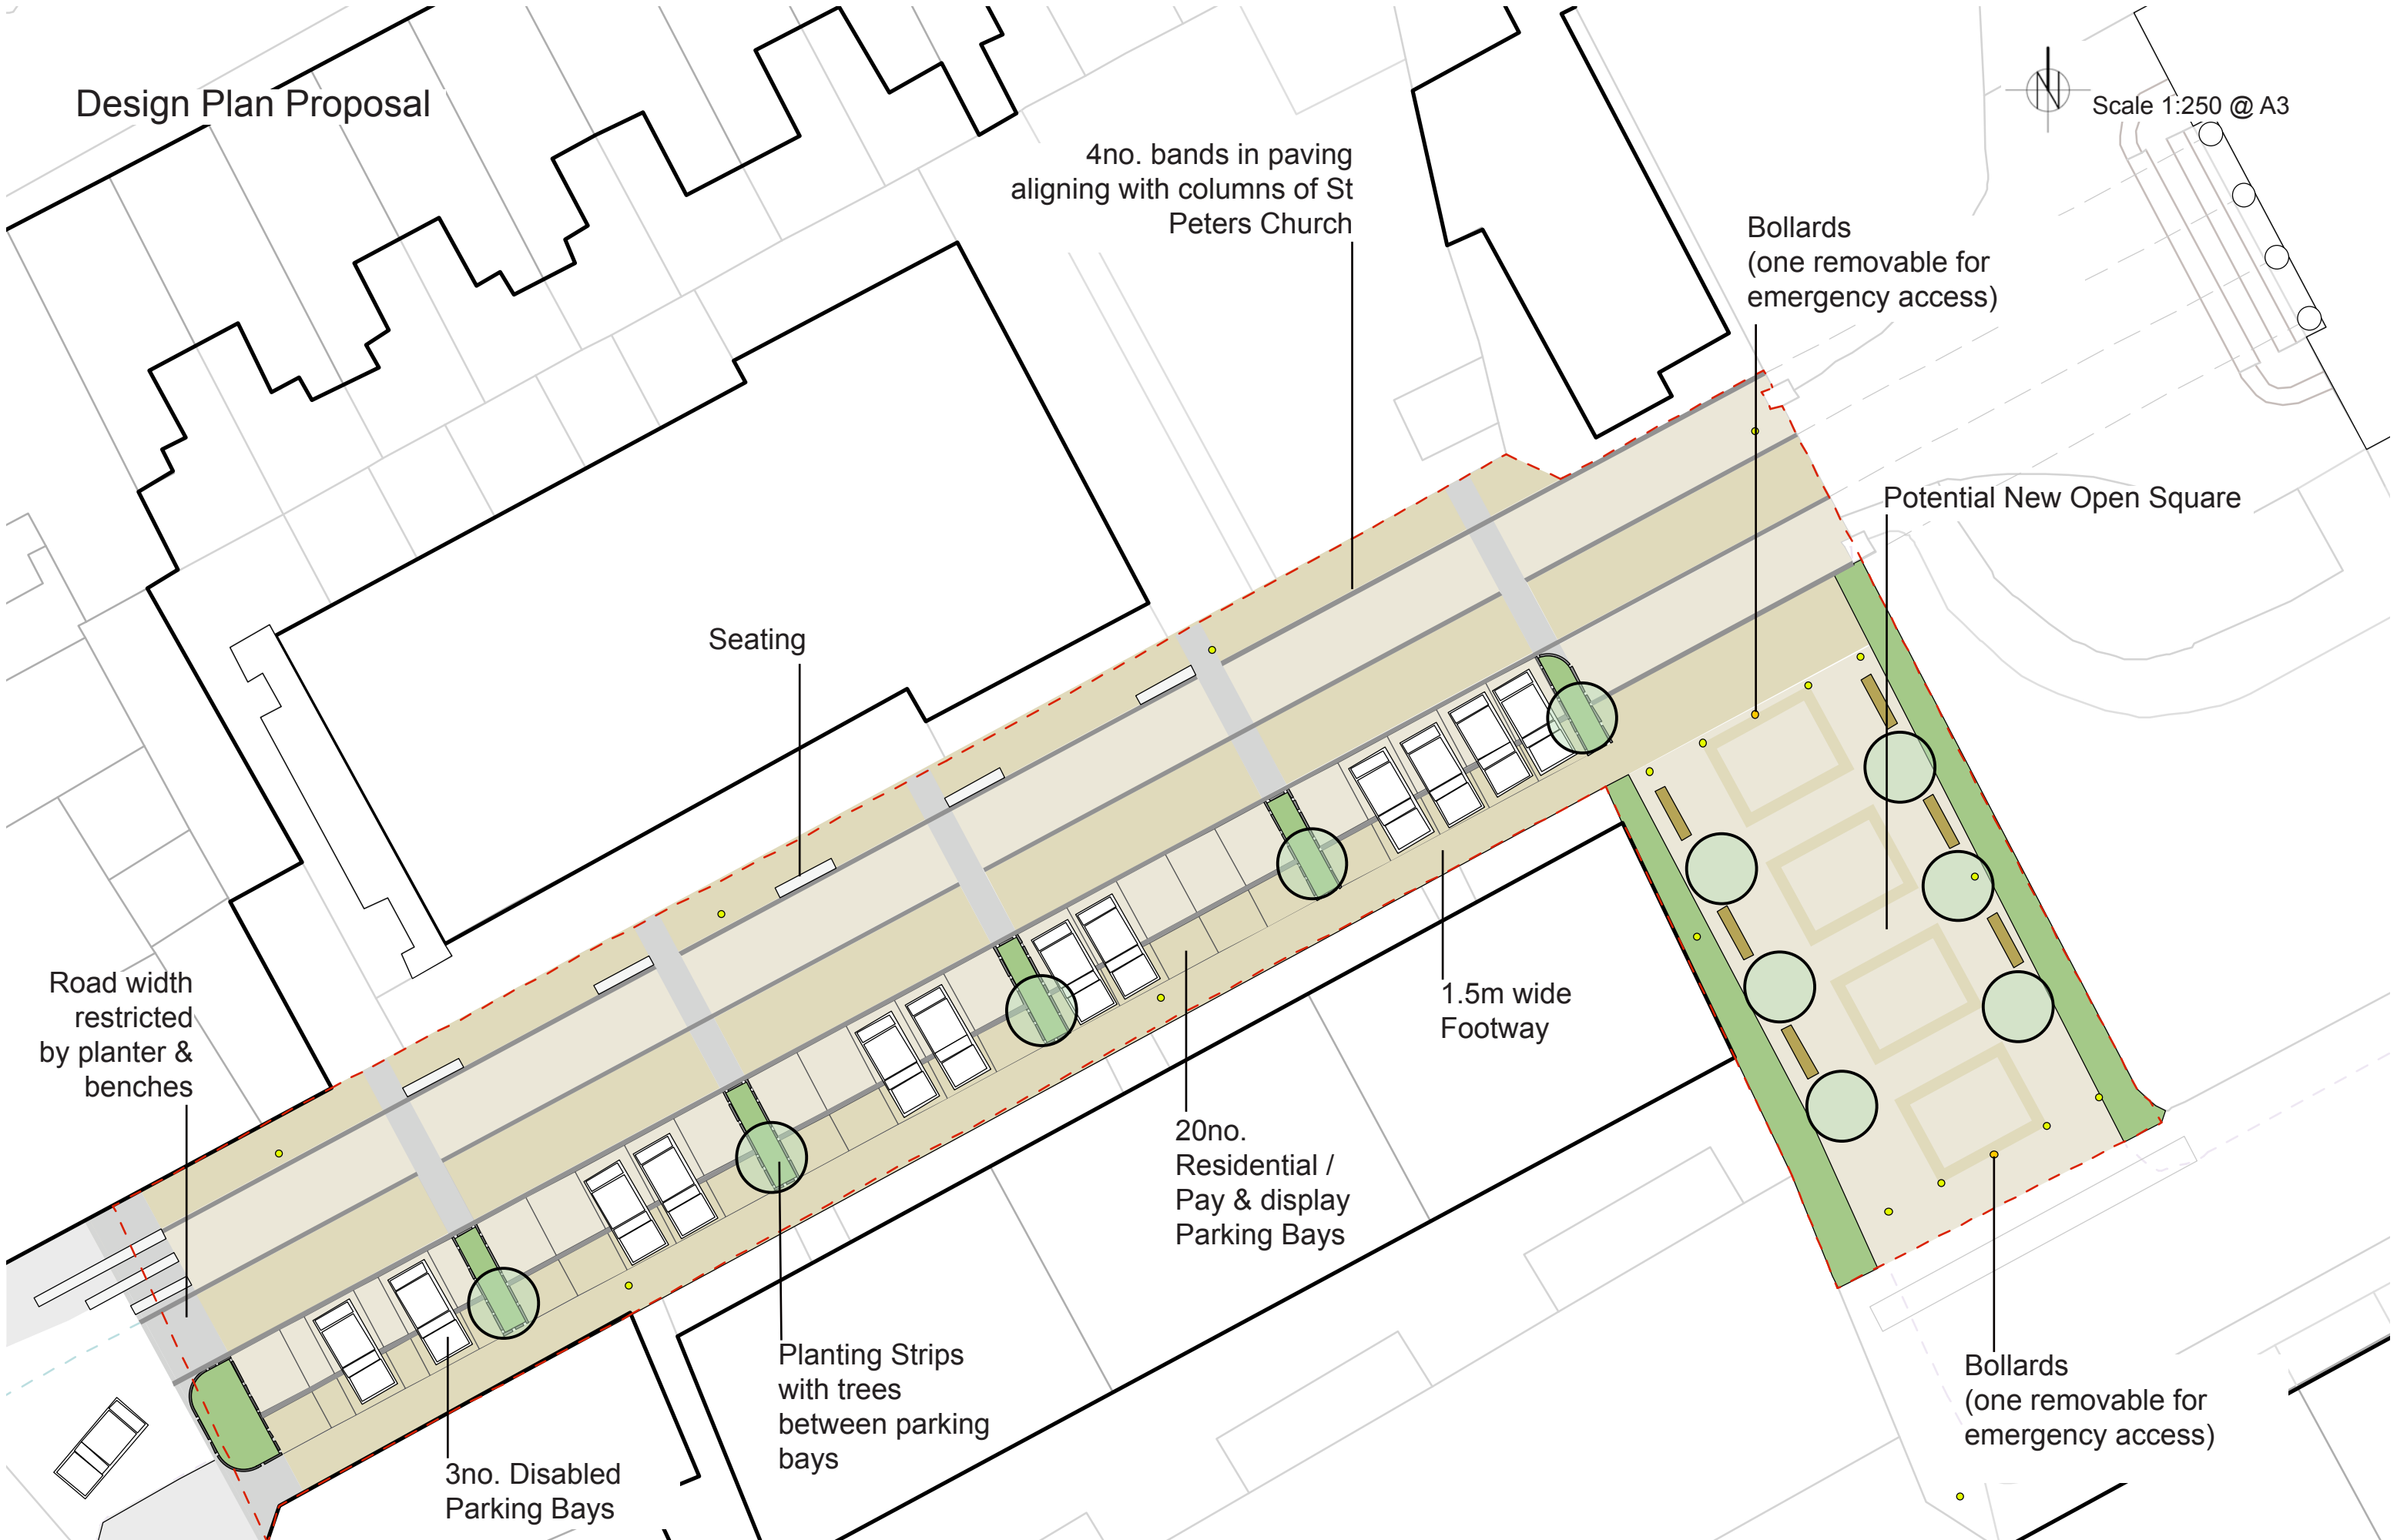

No visual identity to Liverpool Grove entrance enhancing the lack of connectivity to High Street
